BY KAMALIA NATASYA

About me

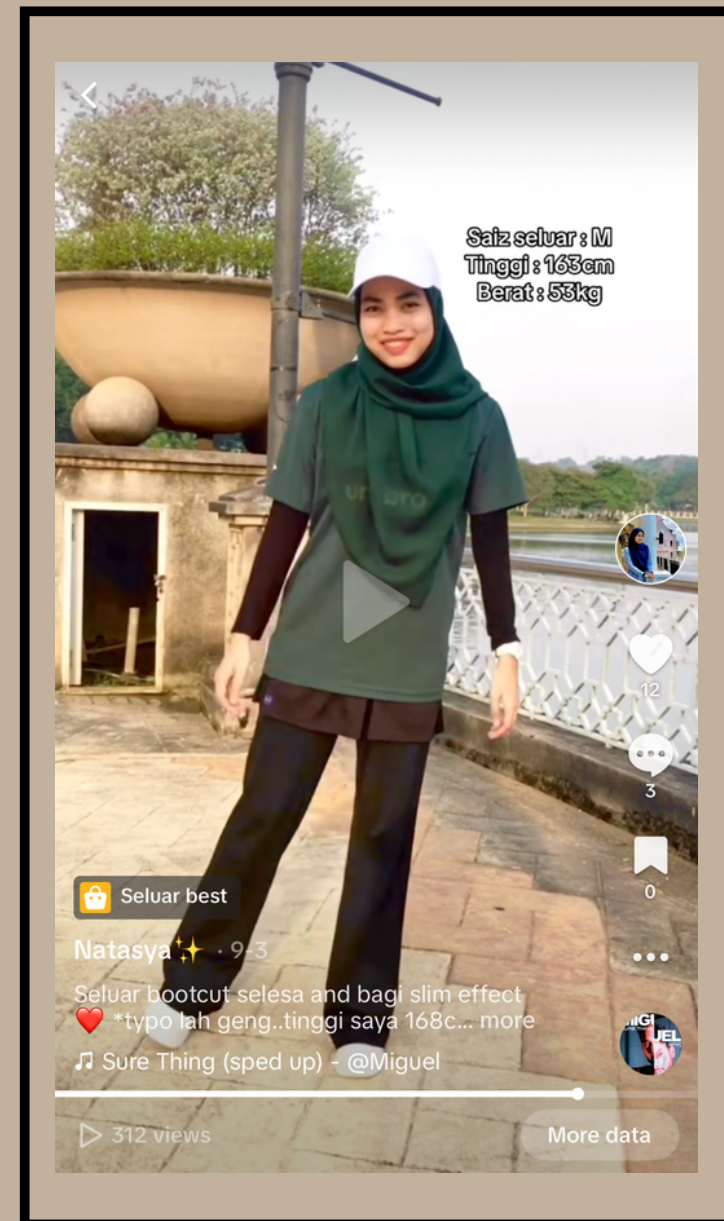

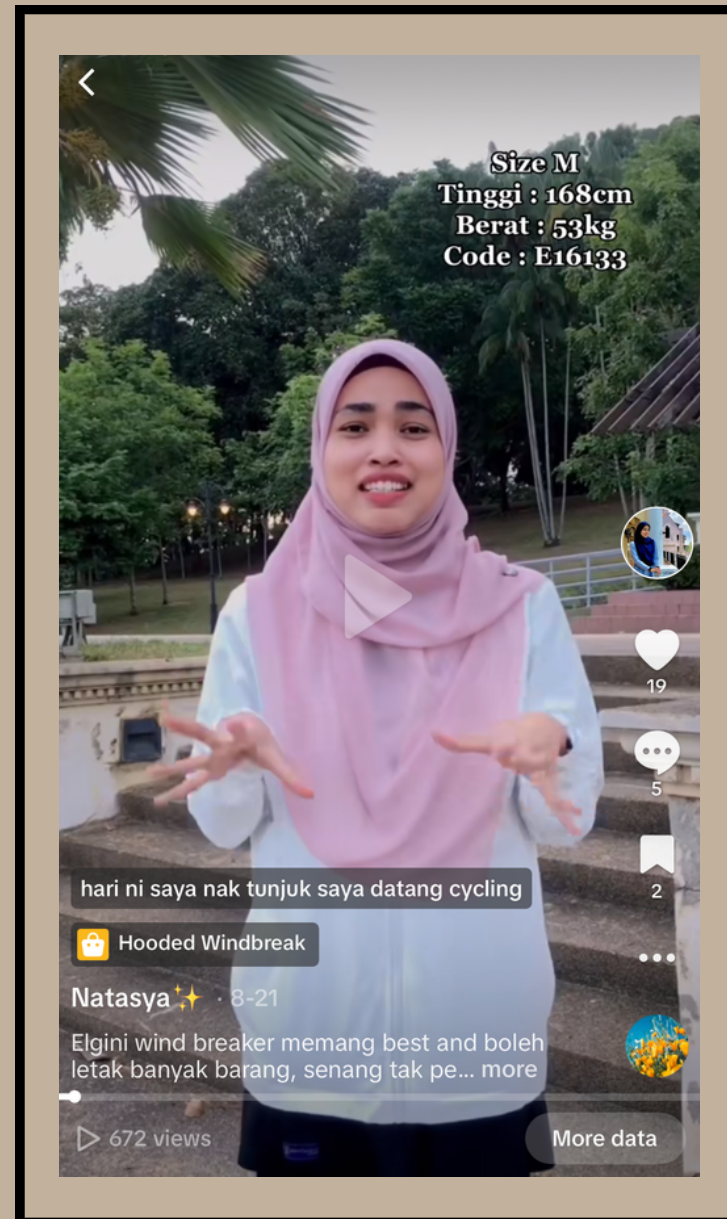

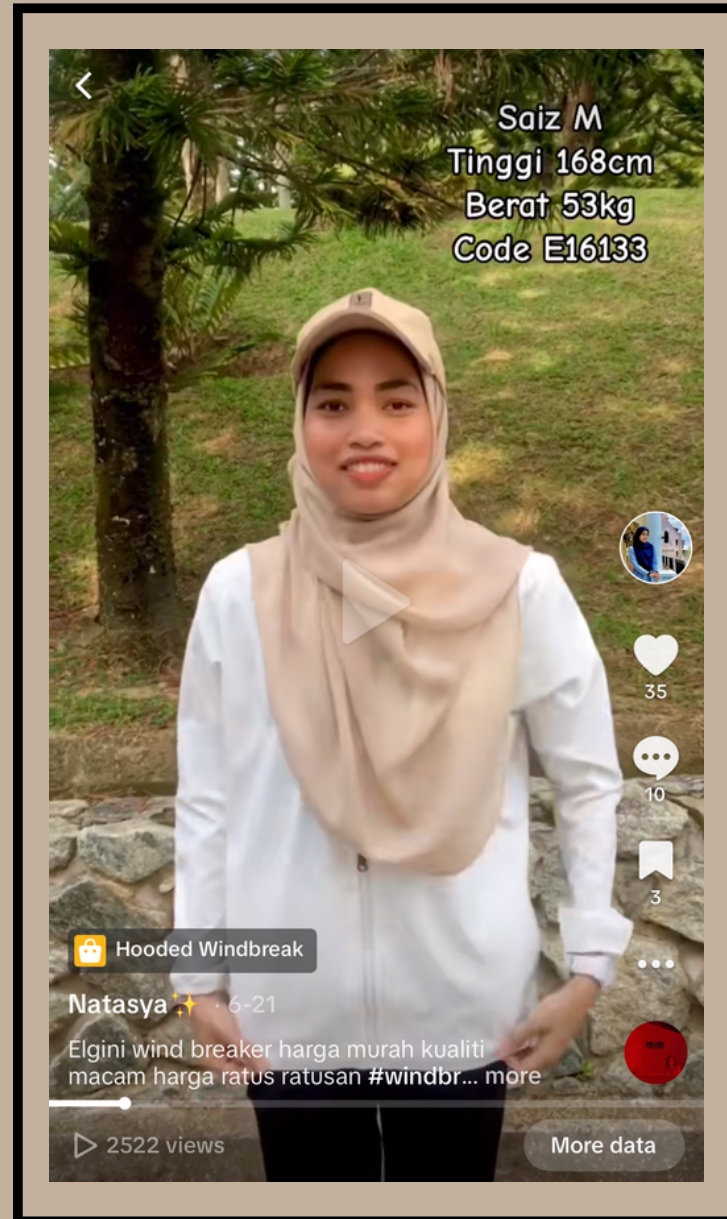

A full time microbiologist with a high passion in the social media field leads me to do part time as content creator. Creating videos, photos and captions based on the requirements stated by the brand or business.

Most of the videos focus on the user generated content and cafe/restaurant reviews while the niche are beauty, fashion and food. However, the type of content available is based on the brand or business requirements such as vlog style video, UGC video, voice over video, transition video, etc.

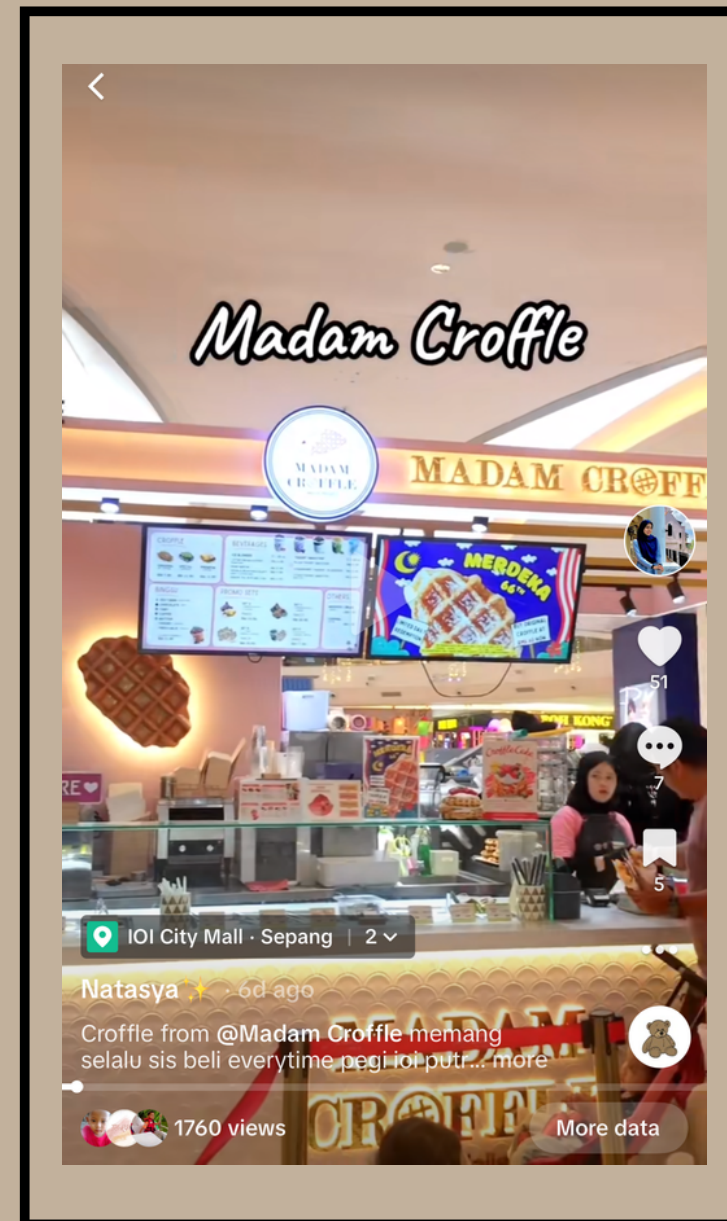

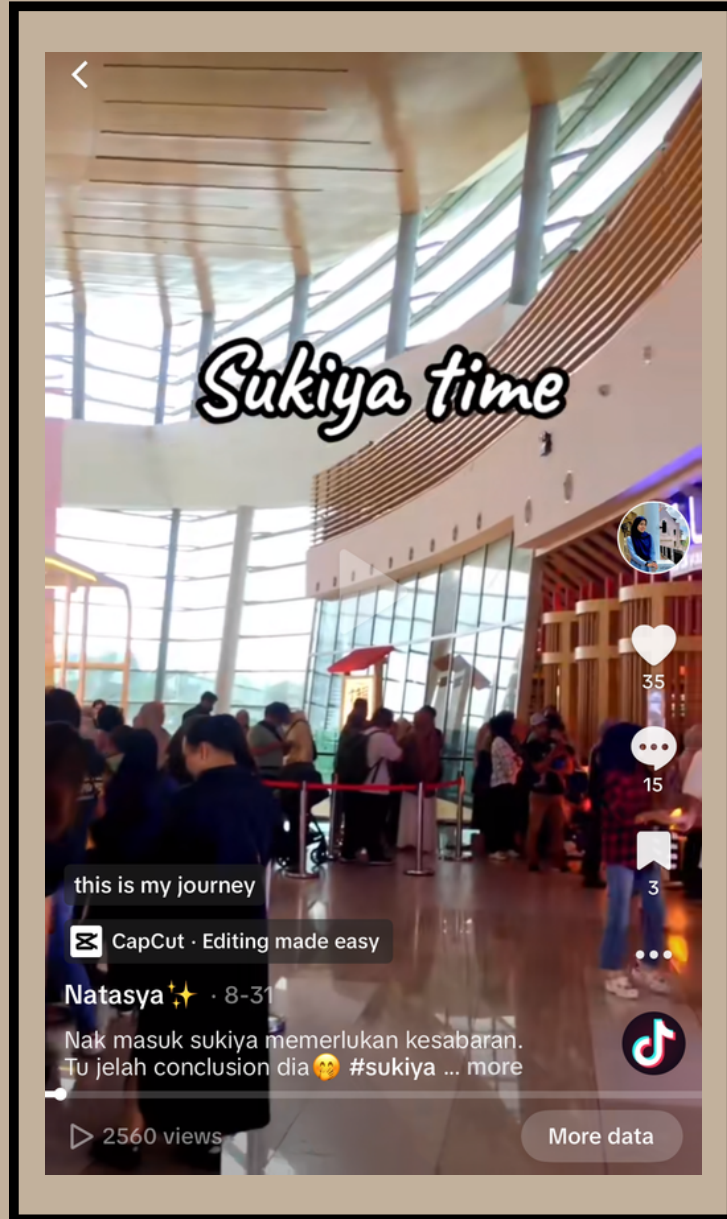

My approach is to effectively attract and communicate with the audience through the videos produced.
