

MIRA'S KITCHEN PRODUCT INTRODUCTION

miracle box miracle bag

“Bring miracles into your kitchen”
EVERYDAY MIRACLE - Mira’s Kitchen

The fruits and vegetables your parents send,
Seasonal food sent by a distant friend,
Nutritious meals and side dishes prepared with love for family health-
We want to keep these precious gifts fresh for a longer time.

The food and ingredients we use every-
Where do you store them now?

“The Birth of a Unique Storage Container”

Mira’s Kitchen has created a one-of-a-kind storage container using **99.9% pure silver**, a material that is **harmless to the human body**.

02 99.9% PURE SILVER

“Why is Mira’s Kitchen Special?”

Mira’s Kitchen is the **only storage container in Korea containing 99.9% silver!**
This storage container, packed with innovative technology, is now coming to your kitchen!

Special Technology of Mira's Kitchen

Mira's Kitchen products contain 99.9% pure silver with powerful deodorization, sterilization, and antibacterial properties.

The technology used in Mira's Kitchen products simultaneously sprays a complex and a reducing agent to precipitate silver particles, forming a continuous silver-coated surface.

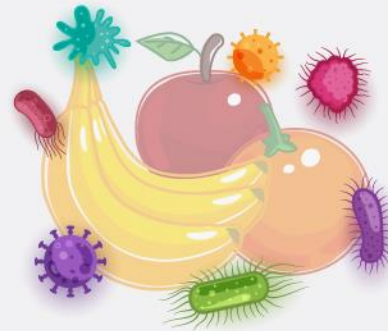

Since the particle size is larger than the nano size, there is no risk of absorption through the skin or respiratory system, and the product has passed tests confirming the absence of harmful substances, ensuring its safety.

Causes of Food Spoilage

Fresh food naturally decays due to microorganisms and bacteria.

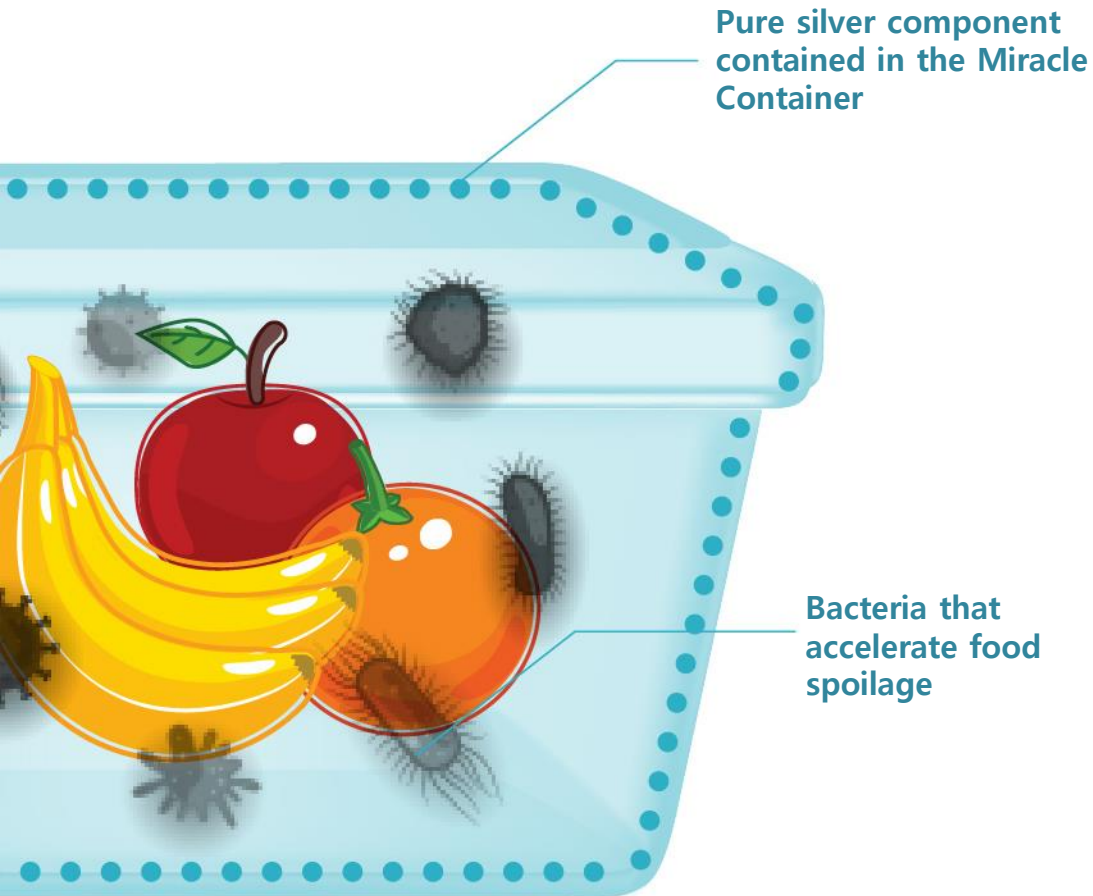

FRESH FOOD

Spoilage begins due to
microorganisms and bacteria

SPOILED

How it works

All foods contain hundreds of microorganisms and bacteria that accelerate spoilage.

Miracle Box is specially designed with 99.9% pure silver, a natural preservative, to eliminate the microorganisms and bacteria that cause food to spoil.

This allows various ingredients to be stored fresh and safe for a longer period.

MIRA'S KITCHEN
miracle box, miracle bag

Long-lasting freshness

Antibacterial & virus suppression

Zero endocrine disruptors

Made in Korea

99.9%
SILVER

99.9% pure silver content

Special Technology

“Why Choose Mira’s Kitchen?”

Point 1 | Mira’s Kitchen is Special.

Point 2 | Mira’s Kitchen is Safe.

Point 3 | Mira’s Kitchen is Smart.

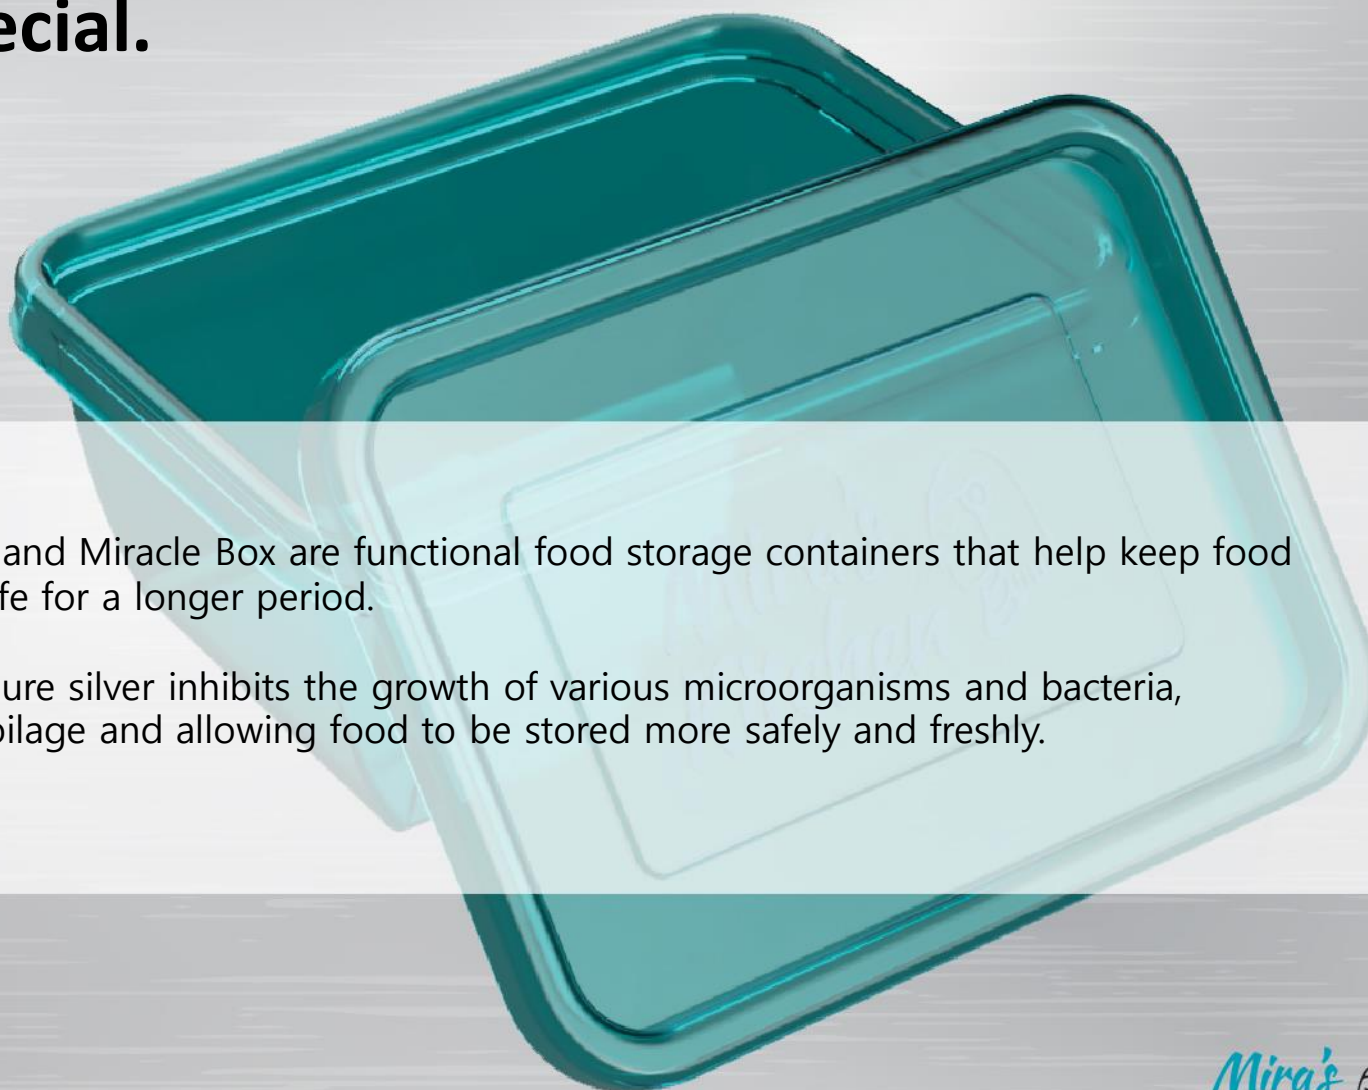

Point 4 | Mira’s Kitchen is Convenient.

Point 5 | Mira’s Kitchen is Durable.

Point 6 | Mira’s Kitchen Enhances Flavor!

POINT 1

Mira's Kitchen is Special.

Miracle Bag and Miracle Box are functional food storage containers that help keep food fresh and safe for a longer period.

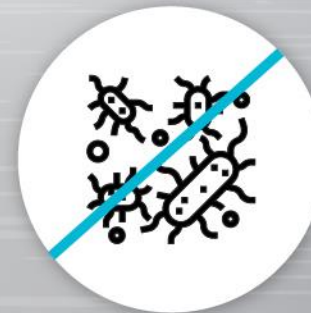

The 99.9% pure silver inhibits the growth of various microorganisms and bacteria, delaying spoilage and allowing food to be stored more safely and freshly.

Silverware Used in the King's Royal Table

Since ancient times, silver cups and tableware have been used to prevent infections and silver containers have been made to preserve food.

Silver has been used as a sterilizing agent for over 1,200 year and the effectiveness of silver is also documented in 'Donguibogam' and 'Bencao Gangmu' (ancient medical texts)

POINT 2

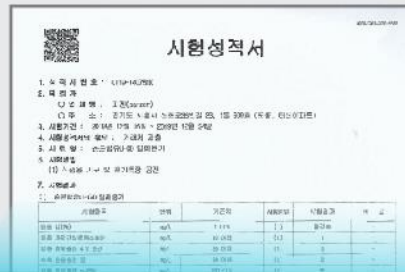

Mira's Kitchen is Safe.

Approved for Food Container Compliance by the U.S. FDA

POINT 3

Mira's Kitchen is Smart.

A | Comfortable handle designed for an easy grip to open and close the lid effortlessly.

B | Lid securely locks with a "click" sound when pressed.

C | Bottom drainage design helps keep ingredients fresher.

D | Compatible lids allow for easy organization of different-sized containers.

E | Maintains the same performance even after washing and reuse.

POINT 4

Mira's Kitchen is Convenient.

- A** | Can be used directly in the microwave without needing to transfer food.
- B** | Dishwasher safe!
- C** | Transparent material allows for easy identification of stored ingredients.
- D** | Durable handle ensures safe storage in the freezer without risk of breakage.
- E** | Spacious size allows for storing large bread loaves without cutting.

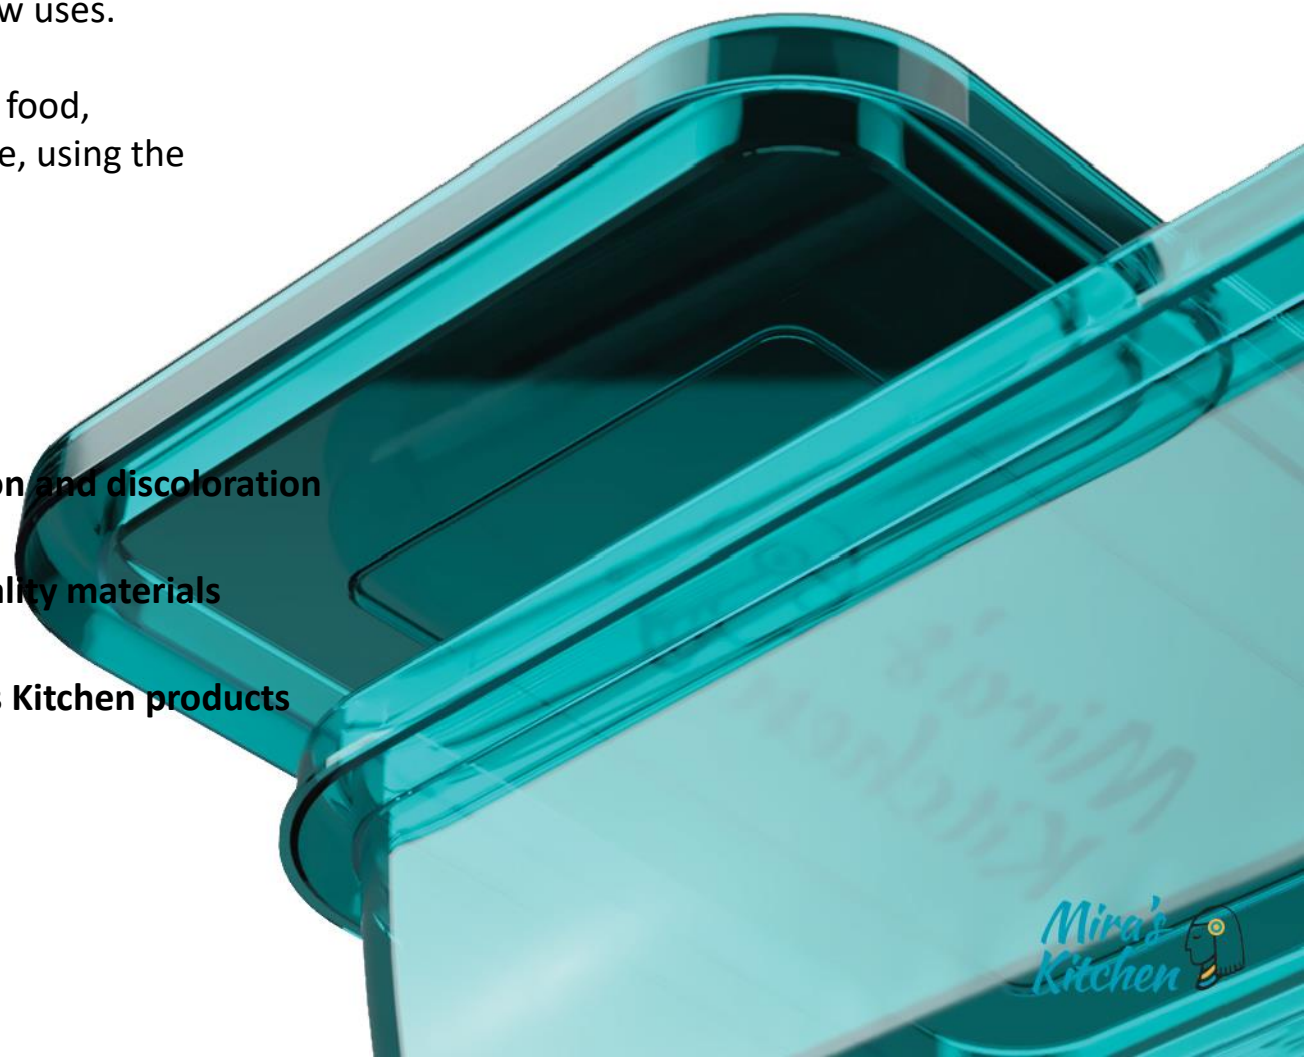

POINT 5

Mira's Kitchen is Durable.

Due to cost-cutting measures, many conventional containers lack durability, often breaking or cracking after only a few uses.

Since Mira's Kitchen products are designed to store food, we ensure they are made properly, in the right place, using the right methods—meticulously and safely.

- Completed quality tests for product deformation and discoloration
- Durable and strong construction using high-quality materials
- Dedicated production line exclusively for Mira's Kitchen products

MADE IN KOREA
MIRA'S KITCHEN

POINT 6

Mira's Kitchen Enhances Flavor!

The far-infrared radiation emitted from the silver contained in Mira's Kitchen products helps food mature and ferment, just like the traditional Korean earthenware pots used by our ancestors.

This enhances the flavor and makes the food taste even richer.

Genuine / Real / Reviews

"Mira's Kitchen rejects exaggerated advertising for marketing purposes."

Raspberry,
Refrigeration Storage - 5 Days

Green Onion,
Room Temperature Storage - 6 Days

I bought it after seeing the ad, and it's really amazing. Strawberries usually spoil quickly even in the fridge, so I honestly didn't expect much...But the strawberries in a regular plastic bag turned white with mold, while the ones in the Miracle Box are still firm and fresh!

I bought it with some skepticism, thinking I had to see it for myself. Leeks are usually stored frozen, but I was curious and tried keeping them at room temperature. The ones in a regular plastic bag spoiled and released moisture, but the ones in the Miracle Bag are still crisp and fresh!! I guess I have to acknowledge it-the effect is definitely noticeable.

"You'll know once you try it yourself."

"Mira's Kitchen rejects exaggerated advertising for marketing purposes."

Wow, this is so fascinating and satisfying that I had to write this review!! The left photo shows the tomatoes when I first bought them and stored them in the Miracle Bag. The right photo was taken two weeks later. Tomatoes usually ripen too quickly, and I always end up using them for juice later. **But these still have fresh, firm skin! I'm totally satisfied!**

I often feel lazy about eating fresh fruit, so I mostly eat bananas and other convenient snacks. As the weather got hotter, bananas started ripening too quickly and turning mushy, so I decided to try storing them in the Miracle Bag. **Surprisingly, the black spots formed much more slowly than usual!**

"You'll know once you try it yourself."

Fake reviews NO! Exaggerated ads NO!

Genuine / Real / Reviews

"Mira's Kitchen rejects exaggerated advertising for marketing purposes."

This is something I just have to acknowledge, so I'm writing this honest review.

The mushrooms on the left were stored in a regular container, and as you can see in the photo, they have turned white with mold to the point where they are completely inedible.

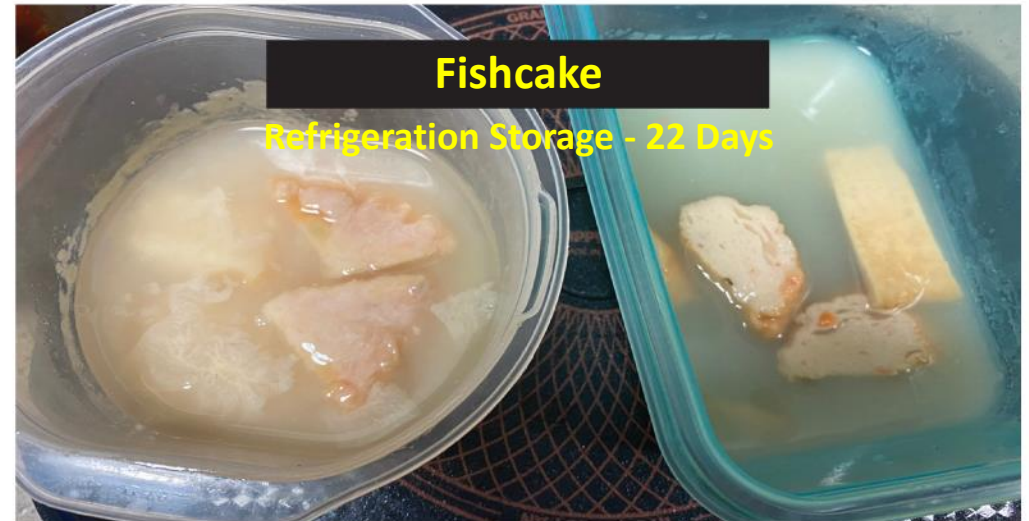

Last time, I bought perilla leaves and chili peppers for a BBQ and stored them in two different containers. The perilla leaves in the regular container became damp, and the chili pepper shriveled up. But in the Miracle Box, the perilla leaves are **still crisp and fresh, just like they were yesterday, and the chili pepper retains its moisture. This is really fascinating!**

"You'll know once you try it yourself."

Fake reviews NO! Exaggerated ads NO!

Genuine / Real / Reviews

"Mira's Kitchen rejects exaggerated advertising for marketing purposes."

Strawberries spoil so easily that I didn't expect much, but the ones stored in a regular container turned white with mold. Meanwhile, in the Miracle Box, there were some signs of aging, **but the strawberries were still fresh and had their red color. The difference is clearly visible!**

I got curious and decided to compare leftover fish cake soup stored in different containers. After three weeks, I nervously opened the regular container, and the rotten smell was so bad that I almost threw up. The soup in the Miracle Box had also spoiled, but there was no foul odor. Even though both had gone bad, the smell and appearance were completely different.

50 tons of food waste every second

A simple savings solution

for the environment and your household budget

✔ **By extending the shelf life of ingredients,**
Reduced food waste!

✔ **With far-infrared rays and
silver ion components,**
